

# Update about critical infrastructure project at WLMH

While we work towards a new hospital, this project will help us continue to provide a safe environment for everyone until the new hospital is ready.

Current work includes:

- Removal of chimney to accommodate the new boilers and mechanical components

- Electrical work for new emergency generators

- Installation of cooling tower

- Updates to front wing corridor including lighting and fire alarm devices and installation of new ceiling tiles.

Thank you for your patience and support while these critical issues are being addressed.
